

Pablo Bentivengo

" I am a Frontend Developer with background experience in Accountability and Logistics. Thanks to these background experiences I learnt to work over due dates and accomplish the given objectives not only effectively but efficiently. I am a proactive person always looking opportunities where I can learn and become a better person and professional. At the moment I am currently studying to get my Software Engineer degree."

WORK EXPERIENCE - SOFTWARE DEVELOPMENT RELATED

Abstract, Remote (Italy): Full Stack Web Developer

March 2022 - Current

Main role is to maintain the project and fix the issues reported by the end-user and the QA Team. Also, to implement new features requested by the end-user between the due dates. It is a tool for the optometrists to realize face to face eye exams, as well as remote exams.

Scandiweb, Remote (Latvia): Front-end Web Developer

January 2022 - March 2022

As a Frontend developer my main task was to fix and maintain the core template of the ecommerce business, issues where created by internal clients and by the QA team
